THE FINAL INSPECTION

Will Be Made of the New High School Building by the Board

Of Education On Next Thursday Before Formally Accepting the Building From Contractor Mowen.

At last night's session of the school board it was decided that the members of the board would visit the handsome new High school building in a body on next Thursday at which time the final inspection will be made and in case of no dissatisfaction the building will be formally accepted from Contractor Mowen.

The architects and committee on buildings and repairs and other members of the board inspected the heating plant this morning and immediately thereafter fires were started in the furnace for the purpose of testing fixtures about the building.

A motion to increase the insurance on the High School building was referred to a committee. There is now about \$10,000 on it and \$10,000 will be added. The committee which audited the books of the secretary and treasurer of the old board made a report showing that the funds were many of them innocent of cash. The contingent fund has been overdrawn \$10,000, and the February payment will not be sufficient to half make up the deficit. In the tuition fund there is about \$4,000 on hand with which to meet the running expenses of the school system, and this is all there is in sight at present. The report was filed without comment.

Thirty dozen No 1 copybooks were ordered purchased. The Shawnee building was reported in bad condition in regard to its heating plant. Two furnaces are used there and one of them regard to its heating plant. Mr. Chl recommended that it be moved on the ground that the 20-foot pipe connecting it with the flue was too long to admit of a free passage of smoke. Dr. Crepa suggested that it might be the fault of poor firing, as he had noticed the grates clogged with ashes when he visited the building at the suggestion of the principal. Superintendent Miller was of the same opinion and another janitor will be sent over this morning to investigate and see what he can do in the way of keeping up the fires and heating the rooms, before the board goes to the expense of moving the furnace nearer the flue.

him that amount to get a surety bond for \$50,000 as demanded by the board. On reconsideration he was allowed \$50 more a year, it having been explained that the former treasurer was permitted to retain the interest on the money placed in banks by the board and under the new code all this goes to the board funds.

Superintendent Miller's report dealt mainly with the disposition he has made with the pupils who have been brown out of their regular buildings by the board of education and the health authorities. He warmly praised the male janitors for so ably assisting in the work. He further recommended the setting aside of \$50 for the purchase of books for the pupils' reading circle, which has become an important factor in their school life. These books are placed at the disposal of the pupils who are directed in the reading of them by their teachers. The pupil who reads three receives a certificate from Columbus a mark of distinction conferred by the state reading circle. Edna, Mr. Miller said stood ahead of all other cities in the state in the number of certificates granted her pupils and he felt that the board could invest this money in a no more profitable manner. His request was at once voted on and granted, several members of the board having children in school who have had the advantage thus offered.

Four hundred seats were ordered, and their length reduced to 22 inches a place of 24 inches as originally contemplated for. These seats are to be in place by March 1. The shortening makes it possible to provide seats for 50 more pupils in the room.

The board has adopted a custom of inviting the teachers to the meeting in order to get acquainted with the members, and last night the room on one side was filled with gentle "marmas" who are teaching the young minds in their new to school. When they left they were invited to return often and next week another delegation will be perforce urged to attend.

At ten o'clock the board adjourned till next Monday, which will be the regular meeting night.

ANNUAL REPORT

Of the Sinking Fund Trustees
Setting Forth Some Cold,

Stern Facts As Published in the Daily News Yesterday, Was Received by Council

Last Night—Most of the Members Had Perused the Report and Did Not Care

To Hear It Read—The New Ordinance Regulating the Closing of Saloons Was Up for Consideration As Were a Number of Other Important Matters.

Last night's meeting of council was one of considerable interest, and while the session was a short one much business was discussed and transacted.

A remittitur of \$98.00 was granted John R. Ashton on his assessment for Pine street paving. He owns a lot at the corner of Pine and Market streets, paralleling Pine for a distance of a little more than 200 feet. His assessment had been fixed at \$655.42, but as this was more than the statutory one-third of its appraised value before the improvement was made, he asked for relief. The code provides that assessment for such improvement may be based on an appraisement of the value of the property with the improvement completed, and consequently an agreement was reached with Mr. Ashton whereby a disinterested committee was chosen to make the appraisement. He chose one member, the city a second, and these two a third. The result was that the valuation of his property was fixed at \$8 per foot front on Pine street, which made his maximum legal assessment \$551.90, instead of \$655.42. The report of the committee was unanimously adopted and the remittitur ordered.

Not So Lucky.
In the case of Henrietta Harper, who owns two lots on Spring street, adjacent to Cole, who objected to burdensome assessments for the improvement of the latter thoroughfare, an appraisement was made and the valuation fixed at \$10 per foot front, placing the appraised or market value of the property or market value of the property at \$600, and the one-third limit of the law at \$200. As she had been assessed \$192.27 no relief could be afforded her and the original assessment was allowed to stand.

Other Lucky Ones.
The protest of Messrs. Williams and Kelley, against excessive assessments for paving south Pine street, in which it was shown that they had been assessed for 120 feet when it should have been but 54 feet, was favorably acted upon and a remittitur of the cost of 66 feet, or \$222.92 was ordered.

Contract Ratified.
The contract recently made by the board of public service with the Lake Erie and Western railroad, whereby the city secures the privilege of crossing the company's right of way with the high tension electric wires to the new reservoir, was ratified after being held up at the last meeting. The line crosses the road from the alley between Pearl and McKibben streets.

Will Draw an Advance.
A resolution declaring it necessary to secure an advance draw of funds from the county auditor in anticipation of the regular February distribution, was adopted. It calls for \$9,000, to be apportioned to the various funds as follows: General fund, \$1,000; public safety, \$2,200; public health, \$1,300; public service, \$4,500.

Atlantic Avenue Sewer Again.
The final legislation providing for the construction of a sewer on Atlantic avenue from the Ottawa to the intersection of Fourth avenue, was

finally adopted, including a provision for the payment of the expense of the improvement.

The Auto Ordinance.
The new automobile ordinance was received and given its first reading. It provides for a speed not to exceed eight miles an hour in the business and closely built up sections of the city, and 15 miles in other portions. Requires bells or gongs or other signal appliance and that signals be given on approaching street crossings or any vehicles or travelers on the streets. Makes light imperative for night running, and provides a penalty of from \$3 to \$25 for violation of any feature of the ordinance. It was given one reading.

The Gambling Ordinance.
The new ordinance relative to gambling, merely makes it incumbent upon the chief of police or upon any officer detailed by him, to destroy all gambling paraphernalia falling into the hands of the department or of any officer of the law with authority to take possession of the same. It covers every form of gambling device, and the question now arises as to whether or not the penny cigar machines are not in this class. If so, what wonderful pyrotechnic exhibitions we will soon have, and what a pile of junk the city will have for sale, after the iron machines have been carted up in front of the city building and introduced to the sledge hammer. The measure was given its first reading.

The Hack Driver Ordinance.
The hack drivers' ordinance, which prohibits soliciting passengers on the platforms, in or about the depot, or upon the grounds of any of the steam or electric roads entering the city, by either hack drivers or the proprietors or agents of any hotel, provides a penalty of from \$5 to \$20. It was sent back to the city solicitor and judiciary committee to have the sidewalks included in its provisions, so as to especially cover the opera house entrance, where from a few to a dozen or more cabbies congregate on show night to solicit patronage after the shows.

The Whiskey Ordinance.
The proposed new saloon ordinance provides for open house from 6 in the morning until 10 at night through the week, with the exception of Saturday night, when it proposes to give two additional hours, making the closing time 12 midnight. It covers all of Sunday, by stating that all places where liquors are sold shall remain closed from midnight of Saturday until 6 o'clock Monday morning, and provides a penalty of \$25 to \$100 fine and the costs, and 20 days' imprisonment, or both.

Not Ready to Adopt.
A motion was made to place this ordinance on its second reading, but a call of the roll, opposition was developed, Messrs. Chappell, Fletcher and Larimer voting nay, and as

"Cur the cough and save the life," Dr. Wood's Norway Pine Syrup cures cough and colds, down to the very verge of consumption.

Men and Women.
The Dr. Wood's Norway Pine Syrup cures cough and colds, down to the very verge of consumption.

there were but six members present, the motion was lost. When seen after the meeting the gentlemen opposing the measure gave as their reasons for such position that they have as yet given the subject no thought, and were not prepared to vote either for or against it. Some thought the time specified for closing too early, and that 11 o'clock would be early enough, while still others regard the present hour, 12 midnight, as about the proper thing.

The Sinking Fund Report.
The voluminous report of the sinking fund trustees as published in this paper on Monday afternoon, was received and ordered filed, the members stating that they did not care to hear it read.

Ordinance Altered.
When the appropriation ordinance as published last week came up for passage, Messrs. Langan and Tolan, of the board of deputy supervisors of elections, appeared and asked that certain alterations in the amounts credited to different funds for the use of the board be re-arranged, in order to give one fund a little greater credit and another not quite so much. As it did not alter the total amount appropriated for election purposes this week was acceded to and the ordinance adopted.

The assessment ordinance providing for the payment of the cost of improving Nye street, was recalled by Mr. Fletcher, and, under a suspension of the rules, was adopted in order to enable the contractors to settle with their men.

That Public Building Project.
A motion was adopted calling for the appointment of a committee of seven, but two of which are to be from the city council, to investigate the feasibility of the project to erect a city building in the Public Square, suggest plans and ideas relative to the same.

Adjourned for One Week.
Owing to the fact that there are five Mondays in this month and that the next regular meeting will not arrive until February 6, Council last night adjourned to meet again on next Monday night.

Peary To Carry Wireless Telegraph Plant On Next Journey For Earth's Northern Apex.

CAPTAIN DRAKE HAS ALREADY LEFT LONDON FOR A FINAL DASH TO DISCOVER THE POLES.

Expeditions that have sought the North Pole, 85.
Number of men lost, 273.
Ships crushed to pieces, 11.
Highest latitude ever attained (by Captain Cagni, of the Duke of Abruzzi's expedition, 1900), 86 degrees 33 minutes.
Highest latitude ever reached in Western Hemisphere (Rob't. L. Peary, 1898-02), 84 degrees 17 minutes.
Distance of pole from farthest point reached by man, 236 miles.

New York, Jan. 17.—Will 1905 record the finding of the North Pole, the Mecca of all explorers? And if so, will it be reached by sledge, automobile or on foot?

This is the question foremost in scientific circles now. More than a hundred expeditions have failed in the quest in the last 35 years, hundreds of lives have been sacrificed in the search. Dozens of ships have been crushed to pieces by the terrible Arctic ice jams.

There will be two dashes for the pole in 1905. One expedition is now on its way. Captain Drake and crew of 26, with provisions for six years, left London 10 days ago for Vladivostok, and thence to Point Barrow, Alaska, which he expects to reach in July. Proceeding easterly to Ford Patrick, Captain Drake hopes to make his first winter quarters in Prince Patrick's Land, and when the summer arrives expects to make with his vessel 50 degrees north latitude.

Then, with two men, and all his dogs, he will make a dash for the pole. He expects to return to the ship in 100 days. Drake is 35 years old and is an experienced navigator. Naturally the most interest in the United States centers on Peary's coming trip. He will start in July in a newly designed ship built to combat the ice floes, and will carry a wireless telegraph outfit with which he hopes to keep in communication with New York until he has reached the pole. The great achievement may be known the same day it is accomplished.

Peary's Plans.
He is now having built at Verona, Maine, the most remarkable vessel of its sort ever designed, one which he thinks will carry him to Grant Land, within 420 miles of the pole. As he has covered distances by sledge greater by 100 miles than that from Grant Land to the pole, he is convinced that this time he will be successful. Peary says of his plans:

"We will pass through Davis Straits along the west coast of Greenland, through Baffin Bay to Cape Sabine, where we will hunt walrus so as to secure a supply of food for the dogs, secure more Eskimo dogs and establish a permanent base of supplies. Here will be left the least aboriginal of our Eskimos.

"Upon our arrival at Cape Sabine we will be about 800 miles from the pole. From there we will travel north to the motherly shores of

TEST YOUR KIDNEYS

Thousands of Men and Women Die Every Year of Kidney Disease Because They Don't Know In Time They Have Gotten Sick.

The only way to keep watch of your health is to test your kidneys at least once a month. Just let a tumblerful of morning urine stand 24 hours, and if it becomes cloudy, or particles float about in it, or if a reddish-brown sediment forms, it is positive proof that your kidneys have been diseased for months and are utterly unable to do their work, and unless properly treated at once, Bright's disease, diabetes, uric acid and blood poisoning, with fatal results, will surely follow.

The only safe and positive cure for all diseases of the kidneys, bladder, liver and blood is **WARNER'S SAFE CURE** the standard of doctors and hospitals for over half a century. It is made of pure herbs and contains no dangerous drugs. Has cured thousands of cases where all else had failed. Safe Cure is sold at all drug stores, or direct, 50 cents and \$1.00 a bottle.

REFUSE SUBSTITUTES AND IMITATIONS.
They are worthless and very often exceedingly dangerous. Ask for Warner's Safe Cure; it will cure you.

WARNER'S SAFE PILLS move the bowels gently and add a speedy cure.

Grant Land, which will bring us within 240 miles of the pole, when I expect to reach some time between September 1 and 15."

At this point Commander Peary expects that his ship will be frozen in and he will spend the long winter night establishing depots along the coast.

"I shall remain with my ship until February," he continued. "With the first light of the summer of 1906 I shall start north with 20 or 25 sledges, each hauled by a team of first-class dogs and with Eskimos who are the very pick and flower of the tribe as drivers.

Chances for Success.
"As to my ship she will not be of pronounced power, but of a shape that will cause her to rise when squeezed between the ice and fall forward, crushing the floes. The bow will thus be of a shape to enable her to smash her way through."

"As to reason for saying that a ship is a crucial part of my trip, I will say that four times in four different seasons I have made sledge journeys, the air-line distance of which almost equaled the distance from Grant Land to the pole and if my ship could have reached Grant Land my sledge journey on one occasion would have carried me 100 miles beyond the pole and back again.

There is therefore more than an even chance of my success this time."

The automobile as a sure means of discovering the North Pole was the novel idea advanced by Cap. B. S. Osborne, an explorer, at the New York Arctic Club.

He predicted that the day was not far distant when people would be making excursions to the North Pole. "The way to find the pole," he continued, "is to build an unsinkable ship. That is possible. Then when you have run that ship to within 100 miles of the pole put the automobile on—the one with gasoline, which will not freeze—go up to the pole and come back in a couple of weeks."

If you cannot eat, sleep or work, feel mean, cross and ugly, take Holister's Rocky Mountain Tea this month. A tonic for the sick. There is no remedy equal to it. 35 cents, Tea or Tablets. H. F. Vorkamp.

MILL TRADE VERY DULL

Output of Flour Curtailed One Half.

Little Export Business—Advanced Prices Responsible for the Decrease—Im- provement is in Sight.

The year 1904 was the dulllest that
has been known in the history of
the flour trade for many years. No
sane miller will tell you that the out-
put of his mills for the past year was
up to the standard, or even venture
to say, honestly, that the business of
the 12 months was up to his expecta-
tions.

Not only the millers have been suf-
fering, but middlemen, the jobbers,
the grocers and the bakers have not
sold by half as much as they did the
previous year. The consumer has
not plunked down as much of his
coin for flour as on former years, and
when he did, in many instances he
went to the jobber direct and pur-
chased his flour at wholesale.

Many housewives did their own
baking and are doing it today to
save on this one class of food. This
has robbed the baker and the grocer
of a large amount of income or pro-
fit on the sale of bread.

An interesting report is secured
from the Northwestern Miller. It

shows that the three big exporting
mills of this section—the Northwest-
ern Elevator & Mill company, the
National Milling company and the
Isaac Harter Milling company—had
a total output for the past year of
only 823,000 barrels of flour. As
compared with the year 1903, when
1,780,000 barrels were manufactured,
it can be readily seen that the out-
put was curtailed more than one-
half.

As one prominent miller put it, his
mills were running only about 40 per
cent of full time and capacity,
while during 1903 the same mills only
lost 13 hours for repairs during the
entire year.

There has been very little flour sold
for export for about a year.
While trade is still dull, in view
of the high prices of wheat, and
while most of the mills are partly or
wholly closed down at the present
time, millers in general express
themselves as seeing improvement in
sight.

NITRO-GLYCERIN

Used in Blowing the Safe at Wauseon Was Stolen From Magazine

Of the Hercules Torpedo Company at Toledo— Five Men Who Robbed the Treasury Are Still at Large.

Toledo, O., Jan. 17.—Nitro-gly-
cerin used by the "yeggs" in pull-
ing off the Fulton county treasury
robbery and the many postoffice and
vault jobs in this section of the
state is undoubtedly procured in
this city.

If there has ever been any ques-
tioning out of Toledo it could easily
be dissipated by the statements
of the men in charge of the Her-
cules Torpedo company.

These men say that about two
weeks prior to every job the East
Toledo magazine is broken into and
from a pint to a quart of the
"soup" is stolen.

The last time the magazine was
entered was on Dec. 22 and within
three weeks from that time the Ful-
ton county treasury job was pulled
off.

The same thing was true with the
West Toledo and East Toledo post-
offices.

The magazine is located on the
Squire McLeary farm, in Oregon
township. Out of the 30 or 40 mag-
azines of the Hercules in this section
of the state the East Toledo place
is the only one bothered. The
"yeggs" are evidently acquainted
with it and when in need of the
"soup" secure it there.

Anticipated the Robbery.

The Hercules men, after the mag-
azine was robbed the last time, have
been watching the papers for a re-
port of a robbery and when it came
they were not at all surprised.

W. E. Budd of the Hercules com-
pany, whose offices are in the Spitzer

STILL AT LARGE

Are the Five Men Who Robbed the Wauseon Treasury.

Wauseon, Ohio, Jan. 17.—No state-
ment has been made by the authori-
ties as to the exact amount of mon-
ey and valuables the robbers stole
from the county treasurer's office
here yesterday morning, but the fol-
lowing estimate is said to be a fair
one: Eleven thousand dollars in
coin and bills and \$5,000 or \$6,000 in
bank drafts.

The five men of the gang reached
Toledo in safety and went direct to
the business portion. The authorities
of two counties and the city police
and detective force of Toledo have
been working on the case for two
days, but have no tangible clue.

mons by Rev. George Wood Ander-

All that the world demands of any
man is some work and a few smiles.

Some people actually feel bitter
toward the assessor because they have
property to be taxed.

The meanest man we have heard
of is the one who stays out late at
night to let his wife get the bed
warm.

The most disagreeable man in the
world is the one who says unpleasant
things just because they happen
to be true.

It is unfortunate for a woman
when she has to remain away from a
society club to which she belongs. She
is never certain that the other mem-
bers did not say something unkind
about her.

A little country editor, with bumps
of wisdom sticking out on him like
bunions on a tramp's foot, says that
"opportunities are like women; if
one man doesn't take them another
will."

Out in Kansas a woman offered \$30
for information as to the whereabouts
of her husband, dead or alive. There
are a whole lot of women outside of
Kansas whose husbands are valued
at the same, whether dead or alive.

A man can only know such a limited
number of people that it ought
not to make any difference where
one lives. The family on the plains
of the West knows as many people
as the flat dweller in New York, and
knows them better, so that the old
theory about its being lonesome in
the country should not hold good.

Why is it that in all fancy pictures
representing farmers the figures are
of old men? Have not the publish-
ers learned that there are a lot of
young and robust men engaged in
farming, and that they shave and get
their hair cut just as any other
class of people? The crude cuts rep-
resenting farmers are an insult to
the most successful and prosperous
class of people this country possesses.

The Atchison (Kan.) Globe says:
"When a girl is first engaged she fig-
ures on a ten-room house in the
swell part of town. As time goes
on the house gradually decreases in
size until it is a four-room structure.
Then all the fancy trimmings are
left off, and next the house is located
in a remote part of town. Finally
when the wedding day comes off, it
is announced that the couple will re-
side with the bride's parents."

CAN LIFE BE MADE SAFER?

One of the most gruesome exhibits
of every recapitulation of a year's
events is the tribute of human life
exact by our industrial operations.

Railway accidents, fires, building
catastrophes, human passions and
greed, and a host of minor causes
conspire, make a mortality bill
which is far ahead in numbers and
sufferings of the destruction caused
by war. Humanity is uneasily con-
scious of the fact that a penalty

must be paid for this horrid waste
of human life. Not only do these
tragedies which distress the country
with painfully recurring frequency
suggest to the survivors that their
turn to suffer and be destroyed may
come next, but there is the feeling
that this disregard for human life,
this willingness to let questions of
money interfere with proper safe-
guards and precautions may bring a
heavier even if hidden retribution.

The press of the country is calling
on the managers of railways, the
builders of hotels and amusement
parks, the authorities in legislature
and councils and all administrative
officials to be more zealous in the en-
forcement or promulgation of regula-
tions looking toward the preservation
of life and limb of our heedless, hur-
rying citizens. "Make life safer" is
the warning that rises up from the
heaps of slain. Pitiful monuments
to the greed, carelessness and hurry
of our life are almost daily erected
by some catastrophe that could have
been prevented.

While it is quite true that no law
and no government will be able ever
to save men from the consequences of
their own recklessness, their feverish
hurry, their own failure to be warned
by past experience, yet public activ-
ity toward removing this evil must
proceed along governmental as well
as individual lines. When men begin
to value their own lives and those of
their fellows more than now is cus-
tomary, a richer content to human
existence will have been found. The
wanton destruction of life is one of
the most barbarous, enslaving, and
degrading traits of human nature.
The only way that we have improved
over our savage ancestors is that we
no longer slay and are slain by the
whim of some representative of the
aristocracy of brute force. We merely
permit death to work with mur-
derous, because uncontrolled ma-
chines, to slay with microbes instead
of arrows.

COX FOR HERRICK.

"The Republican party has been
in the past capable of attending to
its own affairs. Factions are one
thing, party success is another. The
party has always been consistent.
When it fails to be so it deserves
defeat.

"Governor Herrick's administra-
tion was unanimously indorsed by
the last Republican State Convention
and, in my judgment, will be by the
next. Then why not be consistent?
I see only one thing to do. Renomi-
nate Governor Herrick. In doing this
we will maintain our standard and
demonstrate to the people that we
mean to do right. I believe that the
Governor in all his acts was moved
by good motives—motives that in-
tended good for all the people. Un-
less otherwise can be shown I see no
reason why he should not be renomi-
nated. In fact, I think he ought to
be. It was my intention not to com-
mit myself on this subject until my
return from my vacation, but taking
into consideration the fact that my
position may be misconstrued I have
concluded to make this statement
now. I think Governor Herrick is
entitled to the support of all good Re-
publicans. He shall have mine.
GEORGE B. COX."

HIGH SCHOOL

The Lima High School basketball
team made its first appearance for the
1905 season, last night at the Auditor-
ium, and although they went down in
defeat before the whirlwind aggrega-
tion at the Main Street, the defeat
was by no means a disgrace as the
High School boys held their opponents
down to the median score of any team
yet met.

Show played last night went
down in defeat from the White Stars
who played better, although lack of
experience and some good team work
on the part of the White Stars sub-
stantiated the fact that the team of basket-
ball players is a long way from being
a team of any importance of four

LIGHT & CONNER,

134 North Main Street.

needed in interesting James Russell Lowell and many others in my behalf. The president asked the English government officially to grant my release. Mr. Blaine the secretary of state, sent a very strong letter through Minister Lincoln, in London, and I thought when told of it that my day to go was not far away.

It will interest Americans, perhaps, to learn that the representatives of the president and of the secretary of state of the United States met the same courtesy as was shown to all the previous ones. Still my brother was not discouraged. He sent agents to England, who managed to interest the newspapers in the matter, and never did he cease until by the statements of the press upon the favor of my treatment, the representations of many I had never seen the home secretary felt the pressure and was forced to order my release.

"Don't forget thy misery and remember it as waters that pass away." Twenty years had passed away since I had bade my friends goodbye under the Old Bailey, and now 1889 had come. It was a frosty February night, and I was alone in that little room, with its arched roof and stone floor. It was past 7 o'clock, and the prison gloom and stillness had settled down on all the inmates. When suddenly there came the noise of hurrying feet that echoed strangely from the arched roof as the warders tramped loudly on the stone floor of the long hall. A rush of feet, or indeed anything that broke the horrible stillness at that hour, was startling. They were the feet of the reserve guard, which was never called in save when the patrol who glided across the corridors in slippers had discovered some suicide. Many a heartbroken man had I known in that 20 years who in his despair ended his misery thus.

While wondering who the unfortunate could be I heard their steps mounting the stairway leading to my landing, and then a sudden thrill shot through me as they turned down the corridor toward my cell. My heart stood still as I thought, Can they be coming for me? I had a sudden frenzy of fear that they might pass my door; but, no, they came straight on, halted, and Ross, a prisoner,

"You're free" — I had known him 20 years — gave a thundering rap on my door and shouted, "I want you." Then a key rattled in the lock the door was thrown open and three friendly faces looked in. Faint, deadly white, trembling like a frightened child, I started to my feet, trying to speak, but no sound came from my lips for a moment. At last I stammered, "What's the matter?" Ross thrust his arm through the door, and with face close to mine he said the thrilling words, "You're free!" I cried, "I don't believe you," and Ross said, "Come on, my boy, it's all right."

Lake out in a dream I passed out through the door of that little cell whose grim, narrow walls had frowned on me for a score of years and had in vain tried to crush my spirit. Still like one in a dream I went down that long hall, listening only to the strange sound of my own footsteps and saying to myself: "It's all a dream. I shall awake, as I have from thousands of like dreams, and find myself again in my dungeon."

I was led into the outer office, where some papers were read to me and then others given me to sign, but I listened or signed like one in a daze. Suddenly I saw Ross thrust the key into the outer door. That roused me, and the thought flashed into my mind, Now I shall see a star.

The heavy door rolled on its hinges, the ponderous gate was flung back. Stepping out, I intuitively looked up, and a sudden awe fell upon me, for there, like a revelation, shone the Milky Way with its millions of arch of radiant suns. At the sight of that miracle to glory my heart beat fast. I realized that I was free, with health and strength, with courage to begin again the battle of life, and in my irrepressible emotion I cried aloud—and my cry was like a prayer—"God is good!"

During all these years I never saw my companions. Also had been sent to Portland, Noyes to Portsmouth and George to Dartmoor. After 1883 strenuous efforts were made for our release. My sister came to England that year and remained permanently there. She worked bravely and well, but year after year passed without result. None of us was prepared for the vindictive fury of the Bank of England. Its power was all potent with the government. George had been bedridden for years and was slowly dying. At length in 1887 the medical officer of the prison certified his speedy death was certain, and the government released him to die, but he resolved that he would not die until I was free. With liberty and hope health came slowly back, and he devoted every hour to working for my liberation, but for a time he devoted it in vain. More than once had I seen the prison emptied and filled again. Of all the life prisoners I had met there on my arrival or who for years after had joined me I was the sole survivor.

One by one sickness or insanity born of despair had laid them in the prison grave or buried them in the asylum. Out of more than 70 none had lived to be liberated, and determined appeared the Bank of England directors that I should not form an exception, but that I even the prison doors were open to me it should be only when so near death that I might join the many who had gone before.

My fate seemed inevitable, but never for a moment did I cease to believe that fortune's wheel would one day disappear and that I should yet again feel the warmth and sunshine of our smile. From his sickbed and in his health George never ceased his efforts. He said,

SOCIAL.

With Miss Clippin.

PORTLAND AND NORTHWEST

Without change via Union Pacific this route gives you 200 miles along the matchless Columbia River, a great part of the distance the trains running so close to the river that one can look from the car window almost directly into the water. Two through trains daily with accommodations for all classes of passengers. This will be the popular route to Lewis and Clark Exposition 1905. Inquire of W. H. Connor, G. A., 83 East Fourth St., Cincinnati, Ohio.

CARNIVAL OF ICE AT NIAGARA FALLS.

Niagara in winter affords a greater variety and more wonderful frost and ice than any other single place on the globe. Harper's Weekly for December 24th devotes over four pages to some magnificent pictures and a most interesting description of the world's greatest cataraict in mid-winter. The way to reach Niagara Falls from any direction, North, South, East or West, is by the New York Central Railway system. A copy of Four Track Series No. 9, "Two Days at Niagara Falls," will be sent free upon receipt of a two cent stamp, by George H. Daniels, General Passenger Agent, Grand Central Station, New York.

THE GARDEN OF CANADA

The waters of St. Catharines Well are of the mineral saline order and a great specific tonic for rheumatism, gout, neuralgia, or a splendid tonic for those affected with nervous prostration. The use of the waters is accompanied by massage, electricity, etc., given by skilled attendants. Situated on the southern slope of Lake Ontario the climatic conditions and environment are excellent for recuperating. This region is known as the Garden of Canada and a happy hunting ground for health or pleasure seekers. Guarded against the ill effects of modern life by visiting these famous springs. The Welland will be found a comfortable home-like rest cure establishment with sun room, library, music room, roof promenade, and corps of skilled attendants. For further particulars apply to G. T. Ball, G. P. & T. A., Grand Trunk Railway station, Montreal.

FAST FORWARD.

Idaho is one of the best watered states in America. People are moving there because hot winds and destructive storms are unknown and because its matchless climate generates physical and mental vigor and guarantees good health. Idaho has rapidly grown in popularity during the past five years and settlers in its irrigated valleys have met with more than ordinary success. This fact has induced a large influx of eastern capital in the state with the result that its growth has been rapid. If you have in mind a change for the general improvement of your condition in life, or if you are seeking a climate beneficial to health, Idaho will meet these requirements. The easiest—in fact the only direct route to Idaho points is via the Union Pacific. This road runs two trains daily from Chicago and Kansas City to all points in Idaho, Montana and the great Northwest. For full particulars and descriptive information inquire of W. H. Connor, G. A., 53 East Fourth St., Cincinnati, Ohio.

LEGAL NOTICE.

THIS IS A BOTTLE OF
ED. PINARD'S
EAU DE QUININE
HAIR TONIC

Made by the famous French perfumer Ed. Pinard. Like all "bests" it is widely counterfeited. Like all imitations these counterfeits are like the real article only in package. Insist on seeing name on the above bottle when you buy. Ed. Pinard's Eau de Quinine is a positive dressing cure. It penetrates to the roots of the hair and keeps them from falling out—gives life to the temples—prevents balding—gives a new growth of hair. For the hair's sake and the Grandmother's locks.

JUDGE DAY

Will Go to Arizona to Recuparate His Health.

The illness of Judge James H. Day, of Celina, has reached such a critical stage as to necessitate a change of climate. The distinguished jurist will not wait for the expiration of his term on the circuit bench, which occurs next month, but will start immediately for Arizona.

The Bucyrus Evening Telegram has this to say of the Judge:

"Col. Vollrath came in last evening from Upper Sandusky, where he, and Judge Norris held a session of circuit court. In answer to an inquiry as to the condition of Judge Day, the Colonel stated that the Judge was quite ill and decided to leave as soon as possible for Arizona to spend the winter."

"Local attorneys will very much regret to learn that Judge Day's illness is such as to necessitate a trip to the west. They expected him to be here on the 24th, the day for the opening of the January term, and as the Judge's term of office expires on the 8th of February, steps had already been taken to give a grand banquet in honor of the distinguished jurist at the close of the approaching term of court."

"Every lawyer in this county has a high admiration and respect for Judge Day and all sincerely hope that he will regain his health."

For the Nurses at the Hospital

TO BE ERECTED—DECISION REACHED AT YESTERDAY'S MEETING—OFFICERS

ELECTED

No institution in Lima is more deserving of success than the best of all the good things Lima has—the city hospital—and from the numerous additions and improvements made since the founding of this institution, it is certainly pushing forward in a very substantial way.

At a meeting held yesterday it was decided to build an addition to the hospital proper to cost in the neighborhood of \$3,000, to be used by the nurses.

The board of directors re-elected Dr. S. B. Hiner as president, and W. H. Brown, vice president. Mr. Scheide was selected as secretary and treasurer, succeeding Mr. Lockhart, who has filled the office for the past five years. The old board of trustees were re-elected.

MOST LIBERAL AND PROGRESSIVE HOUSE IN AMERICA.

THE LIMA LOCOMOTIVE & MACHINE CO.'S, NEW OFFICE BUILDING

The Osborn Engineering Co., of Cleveland has built some big additional building to the plant of the Lima Locomotive and Machine Company at Lima. The company is now preparing to build a fine modern office building for the same company. The plans were drawn by Architect F. W. Striebing. Herewith we present to the readers of the Advertiser a picture of one of the several new buildings to be erected the coming summer by the Lima Locomotive and Machine Company at their plant on south Main street just south of the Erie railroad. The company are badly hampered for want of room in the machine shops and erecting room and to accommodate that branch of the business the offices and drafting department will be moved into the new building which is to be erected at the north end of the grounds adjoining the time keeper's office, which appears in the picture. Besides the office building, to further increase the room in the erection building, an addition will be built to the south of the present structure thus increasing the capacity of this building nearly one hundred per cent.
